Department of Zoology, Faculty of Science, Kyoto University, Sakyo, Kyoto, 606 Japan

The author had an opportunity of collecting butterflies in various parts of West Malaysia and Singapore in August, 1979. This is a list of the butterflies collected (except hesperiids). In order to keep the explanation of each specimen at a minimum, the year and the month of collection, August, 1979 are omitted and localities are abbreviated as follows:

PH: around the top of the Penang Hill in Penang Island.

LK: Langkawi Island lying in the northwestern part of West Malaysia.

CH14M; CH19M: near the 14th or 19th mile stone of the road through Cameron Highlands.

GH19M; GH29M: near the 19th or 29th mile stone of the Kuala Lumpur-Temerloh Road (located at the foot of Genting Highland).

TPk: Templer's Park in the suburb of Kuala Lumpur.

MPk: Mimaland Park located at the foot of Genting Highland.

S'pore: Jurong in Singapore.

The author is grateful to Mr. O. YATA of Kyushu University and Mr. N. KASHIWAI of Tokyo University of Agriculture who identified the butterflies collected. And thanks are due to Mr. T. ISHII of L.S.J. (Lepidopterological Society of Japan) who provided the author with facilities for collecting butterflies in Singapore. He also thanks Mr. K. MORISHITA of L.S.J. for his critical reading of this manuscript.
